TV8460

Audio video cable

The audio video cable is an accessory for the portable mini–digital recorder. In addition to the image (video) you can also transmit audio with this cable.The audio–video cable is only suitable for cameras with an audio output. Audio data is then saved together with video data on the mini–digital recorder. With another audio–video cable, you can connect the recorder to a monitor and receive a picture and audio. There are 2 cables in the delivery kit.

Product highlights:

- For recording and playing back audio
